

PRESS RELEASE ENGLISH

ENGIE announces the acquisition of the Small & Medium Enterprise energy supply business of IGNIS Group

ENGIE will acquire 100% of **IGNIS Luz**, the SME energy supply division of the integrated energy group IGNIS. The transaction is expected to be completed by mid-2026, subject to the relevant regulatory approvals.

Headquartered in Madrid, IGNIS Luz has experienced significant growth since its launch in 2021. Today, it supplies energy to more than 50,000 customers across Spain, with a strong focus on businesses.

This acquisition strengthens ENGIE's presence in the Spanish market, consolidates its position across the energy value chain and represents an important milestone in its global growth strategy in energy supply for business customers.

ENGIE is a global reference in the energy transition, committed to accelerating the transition towards a carbon-neutral economy. Present in 30 countries, the Group operates across the entire energy value chain, from energy generation to infrastructure and supply. ENGIE is one of the world's leading energy suppliers, serving more than 200,000 BtoB customers. By 2030, the Group aims to supply over 300 TWh of electricity to businesses and residential customers. To support this ambition, ENGIE continues to strengthen its energy supply activities in key European markets, with a clear objective: delivering reliable, competitive and simpler energy solutions that create long-term value for customers.

For its part, through this transaction, the IGNIS Group advances its strategy by maintaining its integrated profile within the energy sector and focusing its energy supply and solutions activities on large consumers. IGNIS will also continue to pursue growth as an independent power producer (IPP), with more than 1 GW of owned generation plants in operation and under construction, and as a strong energy management and asset management company, with 10 GW of operational assets under management across all technologies.

Loreto Ordóñez, CEO of ENGIE Spain, stated: "This transaction is a key milestone in our growth strategy in Spain and reflects ENGIE's commitment to the Iberian Peninsula and to the development of a carbon-neutral economy. We have an ambitious roadmap and a firm conviction that, through innovation, technology, and our experience, we can accelerate the energy transition and support our customers on their path to decarbonization."

Jean-Nicolas Lejeune, Managing Director of ENGIE Supply & Energy Management activities in Iberia, added: "The combination of IGNIS Luz and ENGIE opens a new chapter

in the Spanish energy BtoB market. It is an honor to welcome such a talented team to build this new chapter together.”

Santiago Bordiú, CEO of IGNIS Energy, commented: “Thanks to IGNIS’s vision and drive, in less than five years IGNIS Luz has established itself as a benchmark energy supplier for SMEs. With its integration into ENGIE, this success story will undoubtedly continue. At IGNIS, we will keep delivering best-in-class energy supply and decarbonization solutions to datacenters and industries, leveraging our integrated capabilities within the energy sector and our flexibility to adapt to our customers’ needs.”

Martín Ogueta, CEO of IGNIS Luz, said: “This transaction marks a major milestone in the history of IGNIS Luz and for all its employees. We were born and grew under the umbrella of a major group, IGNIS, and are now joining ENGIE, a global energy leader with whom we will embark on our next phase of growth. To achieve this, we will develop new products and solutions and accelerate the digital transformation of our business and our customer experience.”

About ENGIE

ENGIE is a global reference in the energy transition, with the purpose of accelerating the shift towards a carbon-neutral economy. With 98,000 employees in 30 countries, the Group operates across the entire energy value chain, from generation to infrastructure and energy supply. Its activities combine key and complementary areas: renewable power generation and green gases, management of flexibility assets such as batteries, gas and electricity transmission and distribution networks, local energy infrastructures (heating and cooling networks), and energy supply to households, public authorities, and businesses.

Each year, ENGIE invests more than €10 billion to drive the energy transition and achieve its carbon neutrality objective by 2045. In 2025, the Group generated revenues of €71.9 billion. ENGIE is listed on the Paris and Brussels stock exchanges (ENGI) and is part of major financial indices (CAC 40, Euronext 100, FTSE Euro 100, MSCI Europe) and sustainability indices (DJSI World, Euronext Vigeo Eiris – Europe 120 / France 20, MSCI EMU ESG Screened, MSCI Europe ESG Universal Select, Stoxx Europe 600 ESG-X).

About ENGIE in Spain

ENGIE has been present across the entire energy value chain in Spain for more than 25 years and employs more than 1,700 people nationwide. ENGIE’s strategy focuses on producing energy in an environmentally responsible manner and supporting its customers on their journey toward carbon neutrality. In doing so, ENGIE helps deliver cleaner energy, more sustainable cities, and more efficient industries.

Its decarbonization strategy is based on two main levers: decarbonizing its own energy production through the development of renewable energies, and supporting customer decarbonization through industrial solutions that help reduce energy costs and CO₂ emissions.

ENGIE is the sixth-largest power generation company in Spain, with an installed capacity of nearly 3,700 MW, including more than 1,700 MW of renewable assets (wind, solar, and small hydro) and 2,000 MW of flexible and low-carbon generation. Together with its customers, ENGIE develops and operates more than 300 MW of assets that make the energy transition a reality, such as industrial self-consumption photovoltaic or solar thermal plants, biomass boilers, and cogeneration facilities.

The company is also active in energy supply, trading, and energy management, and is a leading player in structuring and implementing long-term renewable power purchase agreements (PPAs). ENGIE is the national leader in district heating and cooling networks (Barcelona, Zaragoza, Pamplona, Palencia, Ávila, among others) and offers extensive capabilities in the design, engineering, commissioning, and operation of industrial solutions to help customers consume less and better- energy.

ENGIE's key differentiator lies in its ability to manage the entire energy value chain on an integrated basis, including financing, construction, operation, and maintenance of all types of industrial assets for decarbonization. These strengths make ENGIE a trusted partner in Spain to accelerate the energy transition and build a more sustainable future.

ENGIE adquiere el negocio de suministro energético a pymes del grupo IGNIS

ENGIE adquirirá el 100 % de IGNIS Luz, la división de suministro de energía a pymes del grupo energético IGNIS. Así lo han anunciado ambas compañías este miércoles, 25 de marzo.

Con sede en Madrid, IGNIS Luz ha experimentado un crecimiento significativo desde su lanzamiento en 2021. Hoy suministra energía a más de 50.000 clientes en todo el país, con un foco muy relevante en empresas y negocios.

Esta compra refuerza la presencia de ENGIE en el mercado español, consolida su posicionamiento a lo largo de la cadena de valor de la energía, y representa un importante hito en su estrategia global de crecimiento en comercialización de energía.

ENGIE es uno de los mayores comercializadores de energía a nivel mundial, contando con suministros a más de 200.000 empresas. El grupo tiene el objetivo estratégico de suministrar más de 300 TWh de electricidad a empresas y hogares en 2030. Para conseguirlo, ENGIE continúa fortaleciendo sus negocios de suministro energético en los principales mercados europeos, con una misión clara: ofrecer soluciones energéticas valiosas, asequibles y sencillas.

Por su parte, con esta transacción el grupo IGNIS avanza en su estrategia, manteniendo su perfil integrado dentro del sector energético y enfocando su actividad de suministro y soluciones energéticas en grandes consumidores, en particular *data centers* e industrias. También continuará con su vocación de crecimiento tanto como productor independiente de energía (IPP, por sus siglas en inglés) —con más de 1 GW de plantas de generación en propiedad operativas y en construcción— como compañía líder en gestión de la energía y gestión de activos —con 10 GW operativos bajo gestión de todas las tecnologías—.

Loreto Ordóñez, CEO de ENGIE España: "Esta operación es un hito clave en nuestra estrategia de crecimiento en España y refleja el compromiso de ENGIE con la Península Ibérica y con el desarrollo de una economía neutra en carbono. Contamos con una hoja de ruta ambiciosa y con la firme convicción de que, mediante la innovación, la tecnología y nuestra experiencia, podemos acelerar la transición energética y apoyar a nuestros clientes en su camino hacia la descarbonización".

Jean-Nicolas Lejeune, Managing Director ENGIE Supply & Energy Management Iberia: "La combinación de IGNIS Luz y ENGIE abre una nueva etapa en el mercado de comercialización de energía en España. Es un honor dar la bienvenida a un equipo tan talentoso para construir juntos este nuevo capítulo".

Santiago Bordiú, CEO de IGNIS Energy: "Gracias a la visión y al empuje de IGNIS, en menos de cinco años IGNIS Luz se ha consolidado como una comercializadora de

COMUNICACIÓN EXTERNA – SIGNING

referencia para pymes. Seguro que con su integración en ENGIE proseguirá esta historia de éxito. Desde IGNIS continuaremos dando las mejores soluciones de suministro de energía y descarbonización a grandes consumidores, apoyándonos en nuestras capacidades integrales dentro del sector energético y en nuestra flexibilidad y adaptación a las necesidades de nuestros clientes".

Martín Ogueta, CEO de IGNIS Luz: "Esta operación marca un hito importante en la historia de IGNIS Luz y para todos sus empleados. Hemos nacido y crecido bajo el paraguas de un gran grupo, IGNIS, y ahora nos integramos en ENGIE, un líder energético global con el que encarar nuestra próxima fase de crecimiento. Para conseguirlo, desarrollaremos nuevos productos y soluciones y aceleraremos a transformación digital de nuestro negocio y de la experiencia de nuestros clientes".

Se espera que la operación se complete a mediados de 2026, sujeta a las aprobaciones regulatorias correspondientes.
